

Safety Alert

GHS HazCom Training Deadline is Around the Corner - Are You Ready?

In early 2012 OSHA published the revised Hazard Communication Standard (HazCom 2012) to align with the Globally Harmonized System of Classification and Labeling of Chemicals (GHS), to enhance both employer and worker comprehension of chemical hazards and ensure appropriate handling and safe use of workplace chemicals. As such, *employers are obligated to meet a series of phase-in dates to comply with OSHA HCS 2012, starting with the requirement to train employees on the new GHS label elements and new Safety Data Sheet format by **December 1, 2013***, while full compliance with the final rule will begin in 2015. The training requirement affects all employees with potential exposure to hazardous chemicals.

We Can Help!

To help you with your GHS compliance efforts, ACS would like to share our **HazCom 2012 Checklist: What To Do Now** free of charge. In addition, ACS will be offering a series of 60-minute webinars on **GHS Hazard Communication** to train employees on the new requirements.

What participants will learn:

- Regulatory changes to the existing OSHA Hazard Communication Standard (HCS)
- Changes to Safety Data Sheet (SDS) documents and formats
- Changes to chemical classifications and labeling requirements
- Best compliance practices for labeling, authoring, and classification

ACS will provide certification of training for your records, an online recordkeeping system for your training records, regulatory updates and bulletins, and access to our 800 # Helpline.

If you are interested in learning more or scheduling a Webinar, please complete the interest form below and click the "Submit" button. Also, you can fax it to 610.755.0738. For questions, please email us at info@acs-safety.com.
